Dasharo Issues

- Experiments with presenting other data. Feedback welcome.
- In Q2'23 we definitely had more active testers then Q3'23 so far.
- Dasharo Team and community focused more on features then bug fixes.

Dasharo coreboot fork Pull Requests

- In comparison to previous statistics we can see more code related activity (mostly MSI stuff).
- Marging and development tempo is higher if we consider time frame.

Dasharo Space on Matrix

- 22 channels (most active: General, Support, Random)
- 2 new channels
 - **qubes-summit** - dedicated to Qubes OS Summit coorganized by ITL and 3mdeb (<https://qubes.3mdeb.com>)
 - **Dasharo OSFV** - channel dedicated to Open Source Firmware Validation with focus on Dasharo Team maintained Robot Framework infrastructure and Dasharo Certification Lab. More about that in other presentation.
- Libera bridge is suspended, so we are disconnect from IRC.
- Dasharo Disord is misconfigured - currently we have no resources to bring that channel back, we can reconsider that if there would be any interest.
- Dasharo Space on Matrix is official communication channel and since more and more communities migrate to Matrix we will most likely stick with it.

Q&A
