About

The repository for Dasharo User Group presentations is a collection of Markdown files containing the content structured to be rendered using remark.js with 3mdeb's custom remark-templates.

File	Commit	Time
.reuse	reuse: initial support	13 minutes ago
LICENSES	reuse: initial support	13 minutes ago
archive	reuse: initial support	13 minutes ago

Presentations preparation is tracked in GitHub Milestones

The screenshot shows the GitHub Milestones interface. At the top, there are tabs for 'Labels' and 'Milestones', with 'Milestones' being the active tab. A green button labeled 'New milestone' is in the top right. Below the tabs, a summary bar shows '4 Open' and '0 Closed' milestones, with a 'Sort' dropdown on the right. The main content area lists four milestones, each with a title, a progress bar, a completion percentage, counts of open and closed issues, due dates, last update times, and action links (Edit, Close, Delete).

Please let us know how much you don't like it

The Dasharo Developers vPub is a virtual event with the goal of gathering developers and enthusiasts in the technology industry to engage in discussions and conversations related to open-source firmware and other related topics. The vPub is designed to be a less structured, more relaxed environment where participants can share knowledge and ideas, connect with others in the industry, and learn about the latest developments in the field. The conversations can range from technical challenges faced by developers, off-topic discussions, to new features or improvements. These events have brought together experts and enthusiasts from all over the world, providing valuable opportunities for learning, collaboration, and networking. Everything is in a casual atmosphere with a beverage of your choice in your hand.

Please note that the **presentations** at vPub are being **recorded** with the consent of the speakers. If you do not agree to this, please inform us.

The event page for previous **DUG#4** is available at: <https://vpub.dasharo.com/e/11/dasharo-user-group-4>

- migration to events.dasharo.com
 - vpub.dasharo.com seem to be too much focused on virtual events
- grand unification under MkDocs
 - docs.dasharo.com + dasharo.com + events.dasharo.com ?
- Git Cliff support
- Ideas and bug reports welcome:
